VOLUME XXXII—NUMBER 23 BETHEL, MAINE, THURSDAY, SEPTEMBER 23, 1926. 4 Cents Per Copy—$2.00 Per Year

THE J. E. JONES LETTER

PRESIDENT BACK ON THE JOB

The country always seems better satisfied when the President is in Washington at the head of the Government. However the mechanism of our federal machinery is so thoroughly organized that it runs along very smoothly whether the executives are at the Capital or not. What interests Washington more than anything else is the political unrest shown in recent primaries. The defeat of Lenroot of Wisconsin was a shock to the Republican leaders. Lenroot championed the World Court fight and represented the Administration attitude in regard to international affairs more than any other Senator. It is difficult for the Republican leaders in Washington to get it through their heads that the Senatorial matter in the Badger state was decided on issues that have been simple to that State for 25 years. Wisconsin has long shown contempt for those who issue instructions from the Republican National Committee, or eve nthe White House. Thus Lenroot who missed the vice presidency by a hair in 1924, and who succeeded to the leadership of the great Senator Lodge of Massachusetts, has been repudiated by his own State. Such are the fates of politics.

DEMOCRATIC TAX CUT

According to Senator Simmons of North Carolina, the Democrats will attempt to bring about a tax reduction of $360,000,000 in the coming session of Congress. The Republicans made such a success of shifting the burdens of taxation from one class to another and making the public believe that it was thereby saving the total sum of taxation by passing "resolutions," that the Democrats are going to try to get a little similar popularity. To the suggestion Republicans are answering that the Democratic proposal to cancel the war debts makes future tax reductions impossible. It would increase taxes.

DIPLOMATIC IMMUNITY

The Diplomatic set in Washington have their booze, and the prohibition law does not apply to them. Occasionally they peddle it out among their friends, and then there is a populir protest. The other day an aged resident of the city was killed by an automobile operated by the wife of a Legation secretary. Five violations were charged against the woman who drove this particular car. The Coroner's jury held her entirely to blame for the fatal accident; yet she can not be arrested because of "Diplomatic immunity." Some of these foreigners have used their privileges by insulting policemen, driving recklessly through the streets, and in defying the laws just as though no laws ever existed. It all sounds very strange but it is true. One of the penalties of running a free government is that the United States has to overlook insults and abuses that we put up with from privileged foreign officials.

DEAD AIR MEN

The number of deaths of aviators during the past few weeks is appalling. While the Government is promoting the use service in the Army and Navy in carrying the mails, the conviction nevertheless obtains in high official circles that air navigations methods have not yet been worked out. Among those who have watched the game it is often remarked that practically "all fliers have their lives if they stick at the job long enough."

MEETING OF THE KLANS

The Ku Klux Klan came to Washington, pulled off a pale parade, held a secret convention, and then the members returned to their homes again. The officials the Klan expected to Washington was the case of the streets of people who [illegible] paid one at Stanton the Klan. They [illegible] the Klan [illegible]

MODE INDIANS

A few years ago Mr. Indian was said to be "vanishing race." The white man fought the Indians but to love a little better and more favorably and as a result there has been an increase of 41½% in the number of Indians on the United States during the past ten years. The Commissioner of Indian Affairs says that Congress has appropriated more than $400,000,000 for the support, education and enfranchisement of the Indians during the last fifty five years, and he adds that "as the re-

(Continued on page 4)

A large number from here attended the fair at Newry Corner, Saturday.

Mr Harard Eames has gone to Lewiston, where he will enter Bates College.

Mrs. Eugene Martyn and daughter Mona, were in Lewiston one day last week.

BETHEL AND VICINITY

Oxford County fair drew a large quota of people from Bethel.

Mr. Howard Armstrong is working for Elmer Stearns while Thurston's mill is shut down for repairs.

Mr. Robert Hanscom has returned to Providence, R. I., where he is a teacher in the Moses Brown school.

Mr. R. F. Spearrin and Mr. Ross James of Portland spent the week end with D. H. Spearrin and family.

Rev. Charles Easternbrook was in Pittsfield, Me., this week to attend the conference of Universalist churches.

Mr. and Mrs. E. E. McKeen motored to Portland, Sunday, where they visited Mrs. McKeen's daughter and son.

Mr. and Mrs. Ralph Taylor and daughter of Portland were week end guests of Mr. and Mrs. H. P. Austin.

Miss Gladys Spearrin and friend of Lynn, Mass., were week end guests of her parents, Mr. and Mrs. D. H. Spearrin.

Mr. E. G. Harrison has a pullet that dropped her first egg on Sept. 12, and six days later she dropped one weighing 2 1-2 ounces.

Miss Bertha Bailey and Master Bailey Wentworth of Kennebunkport, Me., were recent guests of Mr. and Mrs. H. W. Boyker.

Mr. C. E. Tidswell went to Upton, Tuesday, where he will be employed as cook in the camp of J. Howard Lemon of Boston, Mass.

Mr. Arthur Corkery, who has been working at Portsmouth, N. H., during the summer, was the week end guest of Judge and Mrs. A. E. Herrick.

Mr. and Mrs. Arthur Richardson are spending a few weeks at their home in Mayville. They have been at the Wentworth Hotel, Portsmouth, N. H., during the summer.

Mr. and Mrs. A. D. Forbes are receiving congratulations on the birth of a daughter, Sept. 19. She has been named Beatrice Annie. Mrs. Charles Bean is caring for them.

Messrs. W. C. Bryant and J. Willis Bartlett have been drawn as traverse jurors for the October term of Supreme Court. D. W. Cushing of West Bethel was drawn as grand juror.

Mr. and Mrs. A. Van Den Kerkhoven and son, Eugene, are attending the annual meeting of the Telephone Association of Maine at Augusta. Mr. Van is secretary and treasurer of the Association.

Mr. Clifton Wilson of Woodstock loaded eighteen head of Whitehall cattle at the G. T. R. station Monday morning. He was taking them to the Oxford County Fair where they will be on exhibition.

Mrs. Harriet Colley, manager of The Bethel Inn, was presented with a beautiful silver loving cup and fork last Wednesday evening, the gift of about forty guests who have been at The Inn during the past summer.

Mr. and Mrs. Carroll Mitchell have a daughter, born Sept. 10, who has been named Marylyn Mitchell. Mr. Mitchell was for a time a clerk in Foster's store, and Mrs. Mitchell is the daughter of Mr. and Mrs. Morrell of Farmington.

Miss Muriel Park [illegible] Miss Mary Hay of Portland, left [illegible] Monday for [illegible] Washington. [illegible] Miss Park will [illegible] Bates Theatre, Miss [illegible] and school courses at Bates in Hall. Miss Hay is to be a student at the Art [illegible]

The device of a flock leaving car, Maine plates 102,762, failed to make the turn at Shaw's Corner, Sunday night and came to grief against a large elm tree in the yard of Leslie Spinney. The occupants of the car were not injured beyond a bad shaking up, but the car was badly wrecked.

Clayton Verham and Raymond Hathorne of Walker's Mills were slightly injured Saturday afternoon when the side car of the motor cycle they were riding became loosened, causing them to run out of the road through a fence and into some bushes. Verham received cuts on one leg and Hathorne a badly wrenched arm. The accident happened on the Locke's Mills road near the residence of Carl Brown.

LAPHAM—CROSS

A very quiet wedding was solemnized at the home of the officiating clergyman, Rev. C. B. Oliver, Saturday afternoon at three o'clock, when J. Carlton Lapham and Lillian Gertrude Cross, both of Greenwood, were united in marriage. The double ring service was used. The young couple were attended by Miss Annie Cross, an aunt of the bride, and Mr. Davis, a friend of the groom.

Mrs. Lapham is the daughter of Mr. and Mrs. W. C. Cross of Greenwood, and is a graduate of Woodstock High School.

Mr. Lapham is the son of Mr. and Mrs. M. A. Lapham of Locke's Mills. He is a graduate of Woodstock High School, and is employed in the E. L. Tebbets Spool Co. mill.

The young couple will make their home in Locke's Mills.

THURLOW — HENDRICKSON

A quiet but pretty wedding took place at the home of Mr. and Mrs. A. R. Hendrickson, Wednesday evening, Sept. 8th, when their daughter, Myrtle Lena, became the bride of Arthur Newell Thurlow. The ceremony was performed by Elder O. D. Purdy of Portland.

The room was tastefully decorated with cut flowers, the bridal couple standing under an evergreen arch with sprays of golden rod nestled among the ferns, and a white wedding bell hanging from the center. The arch was banked with small evergreen trees and potted geraniums in front.

The bride was lovely in a dress of white serge trimmed with white fur and satin ribbon and she carried a bouquet of white asters tied with satin streamers.

The bridesmaid was Miss Mary Hendrickson, sister of the bride. The best man was Walter Appleby, a friend of the groom.

Only the immediate family and intimate friends of the couple were present. Immediately following the ceremony refreshments of punch, ice cream and cake were served, the bride cutting her cake.

Mrs. Thurlow is the eldest daughter of Mr. and Mrs. A. R. Hendrickson and has always lived in Woodstock where she has taken an active part in the social affairs of the community.

Mr. Thurlow is the youngest son of Mrs. Winnie Thurlow of Pigeon Hill where he has lived for the past few years, but formerly lived in this town.

The newly wedded couple left for their home on Pigeon Hill amid a shower of confetti and good wishes from their friends.

GRANGE NEWS

OXFORD POMONA GRANGE

Oxford Pomona Grange met with Round Mt. Grange, Albany, Tuesday, Sept. 7th with all regular officers present. After the regular business had been conducted Brother Hanno Cushman gave a few appropriate remarks. Nine candidates were instructed in the First Degree. A bountiful dinner was served to about 200. The afternoon session opened with the roll call as follows: Paradise Hope 7, Hebron 3, Paris 17, Norway 14, Oxford 9, Bethel 10, South Paris 15, Franklin 11, North Oxford Valley 6, Albany Hope 3, Buckfield 17, West Paris 6, Riverside 3, Waterford 7, Locke Mills 8.

The Lecturer presented the following [illegible]

Song, America, by all
Address of Welcome by the Master [illegible]
Response by Mr. Strong
Song by the Pomona Quartette
Reports of Subordinate Granges [illegible]
Song by Mrs. Mabel Mitchell and Mrs. Mary Hay
Address by Mrs. A. P. Nelson
Song by the Pomona Quartette
Remarks by Mr. Wentworth
Closing Hymn, "God Be With You Till We Meet Again"

The next regular meeting is with Bear Mt. Grange, So. Waterford, with Mr Felker as speaker.

Mrs. E. C. Park and daughter, Muriel, were in Norway, Saturday.

BEAR RIVER GRANGE FAIR

It is a foregone conclusion that the weather will do its part toward making the Bear River Grange Community Fair a success, and this year was no exception for Saturday, September 18, was an ideal day for the event.

There was an attendance of some two thousand people, all of whom seemed to be happy in greeting old friends and making new acquaintances.

The exhibit of stock was better than ever. The display in the hall, while not quite as large as last year, was of good quality. Special mention should be made of the display of flowers exhibited by Mr. George N. Emmons of West Paris who had a splendid variety of gladioli, also specimens of phlox, dahlias and roses.

The Grange is grateful to all who in any way assisted in making the fair a success.

The following is a list of the premiums awarded:

Drawing horses—Judges, Dana Dudley, Ernest Morrill, John Deegan. Two lbs. rock to each lb. horse. R. Westleigh 1st. Weight of team 2675, 703 ft. 3 in; Ray Thurston, 2nd, weight of team 3,000, 721 ft. Sweepstakes—Weight of load 7690 lbs. Roy Thurston, 1st, distance 245 ft. 4 in; Ray Thurston, 2nd, distance 7 ft. 6 in.; A. R. Merrill, 3rd, 5 ft.

Drawing oxen. Judges same as for horses. C. R. Wilson 1st, C. R. Wilson 2nd. Two year old steers, Ole Olsen 1st, distance 429 ft.

Thoroughbred Hereford cattle:
Best herd—C. R. Wilson 1st.
Best cow—Ole Olsen 1st, C. R. Wilson 2nd.
Best 3-year-old—C. R. Wilson 1st.
Best yearling—C. R. Wilson 1st.
Best calf—C. R. Wilson 1st.
Thoroughbred Durham cattle:
Best herd—F. W. Wight 1st.
Best 3 year old bull—F. R. Merrill 1st.
Best 2 year old bull—F. W. Wight 1st.
Best 3 year old heifer—F. W. Wight 1st.
Best calf—F. W. Wight 1st and 2nd.
Best thoroughbred Guernsey bull—Mark Arsenault 1st.
Grade Durhams:
Best cow for stock—C. W. Godwin 1st and 2nd.
Best 3 year-old heifer—F. W. Wight 1st.
Best yearling heifer—C. W. Godwin 1st.
Grade Herefords:
Best cow and calf—Ole Olsen 1st.
Best town team of oxen—C. R. Wilson 1st
Best pair working oxen—C. R. Wilson 1st and 2nd.
Best matched oxen—C. R. Wilson 1st.
Best matched 3 year olds—C. R. Wilson 1st and 2nd.
Best matched 2 year olds—Ole Olsen 1st, C. R. Wilson 2nd.
Best matched yearlings—C. R. Wilson 1st and 2nd.
Best matched steers—Ole Olsen 1st, C. R. Wilson 2nd.
Best coke steers—C. R. Wilson 1st
Best fat cattle—Henry Godwin.
Best bull—Henry Godwin.
Best cow and pair—Henry Godwin.
Household products:
Best specimen butter—Mrs. H. S. Hastings 1st.
Best loaf of cake—Ruth Brinck, age 10 years, 1st; Marion Leonard, age 12 years, 2nd.
Best plate of cookies—Alice Saunders 1st, Mrs. A. W. Hallett 2nd.
Best mashed potatoes—Mrs. Doris Foster 1st.
Best dozen eggs—Fred Bonnie.
Best display canned goods—Mrs. A. W. Hallett.
Most complete display—Mrs. Mertie Mitchell 1st.
Best [illegible]—Mrs. Alberta Hanscom 1st, Mrs. A. W. Hallett 2nd.
Best [illegible]—Mrs. Doris Foster 1st.
Best [illegible]—Mrs. Doris Foster 1st, Mrs. Irwin Foster 2nd.
Towel quilt—Mrs. Irwin Foster 2nd.
Knitted mats—Mrs. A. W. Hallett 1st.
Children's fancy work:
Towels—Dorothy Hutchins, age 9 years, 1st; Rose Sweatt, age 7 years, 2nd; Ruth Brinck, age 10 years, 3rd.
Embroidered apron—Josephine Thurston, age 8 years, 1st.
Exhibit of painting—Elwyn Wheeler, age 13 years, 1st.
Vegetables: For largest and best display of garden vegetables raised on one farm—P. I. French 1st, W. B. Wight 2nd, H. S. Hastings 3rd.
Squash—H. S. Hastings 1st, P. I. French 2nd.
Pumpkin—F. I. French 1st, E. E. Bennett 2nd.
Tomato—W. B. Wight 1st, E. E. Bennett 2nd.
Onion—W. B. Wight 1st, F. I. French 2nd.
Beet—W. B. Wight 1st, F. I. French 2nd.
Fruit, largest and best display—S. P. Davis 1st, G. N. Emmons 2nd, O. N. Fox 3rd.
Best display of vegetables by child under 12 years—Kenneth Brooks, age 9 years, 1st.
Cucumber—L. A. Roberts 1st, H. S. Hastings 2nd.
Carrot—E. E. Bennett 1st, P. I. French 2nd.
Turnip—W. B. Wight 1st, H. S. Hastings 2nd.
Cabbage—H. S. Hastings 1st, W. B. Wight 2nd.
Cauliflower—G. N. Emmons 1st.
Best three yellow corn—H. S. Hastings 1st.
Best three sweet corn, yellow—W. B. Wight 1st, E. E. Bennett 2nd.
Best three pop corn—L. A. Roberts 1st.
Muskmelon—P. I. French 1st.
Watermelon—P. I. French 1st, E. E. Bennett 2nd.
Celery—G. N. Emmons 1st.
Onion—E. E. Bennett 1st.
Potato—W. B. Wight 1st, E. E. Bennett 2nd.
Squash—P. I. French 1st.
Display—
Basket Beets—H. S. Hastings 1st.
White Explorer bens—P. I. French 1st, Hastings 2nd.
White Leghorn chicks—H. S. Hastings 1st, P. I. French 2nd.
Plymouth Wyandottes—Allen Hutchinson 1st.
H. P. Rocks—Willard Wight 1st.

TRAIN SCHEDULE

The following is the schedule of trains leaving Bethel:

Trains for Portland leave at 8:33 A. M., and 4:42 P. M.

Trains for Montreal leave at 10:17 A. M., and 8:33 P. M.

Sunday services will be the same as week days until Sept. 26, when a change will be made.

Miss Esther Tyler was home from Portland over the week end.

Mr. Charles Bean returned from Portland, Monday, after spending two weeks with relatives there.

GOULD ACADEMY NOTES

A recess was declared for Wednesday in order that the pupils might attend the Oxford County Fair at Norway.

Miss Doris McGinley of Wilson's Mills, Maine, has joined the Freshman class this week.

The school orchestra has been organized under the direction of Miss Martin and the first rehearsal was held on Monday afternoon. The following make up the personnel of the orchestra: violins, Madeline Brinck, Rachel Bean, Addison Saunders, Daniel Wight, Raymond Parsons; cornet, Clarence Snow; saxophone, Elizabeth Spiller; piano, Kathryn Ramsell with Glenyce Cole assistant.

Several of the boys from Holden Hall accompanied by Mr. Brasier and Mr. Ayer climbed Mt. Spec in Grafton on Saturday.

With the larger enrollment of boys at Gould, the inter-class competitions in the various sports should be keener than ever. The Freshmen, twenty-one strong, should give a good account of themselves, especially against the rival Sophomores, who number only nine.

The first of the inter-class games in soccer will start next Monday.

This Thursday a practice game between the Seniors and Freshmen vs Juniors and Seniors will be played to give the new boys an idea of how the game of soccer should be played.

A soccer team representing the school will probably play a team from Woodstock High of Bryant's Pond the last of the month. The management is anxious to find outside competition.

There are several promising boys who should make strong bids for the Gould teams this year. The most outstanding are: Carleton Holmes brother of "Dick" Holmes, who is well known to local fans, Donald Hanscom of Mechanic Falls and Jack Gill of Acushnet, Mass. Gill has had considerable experience in playing soccer and should strengthen his class team considerably.

ALBERT L. WHITMAN

The community was saddened by the sudden death on Friday morning, September 17th, of Albert L. Whitman, a lifelong resident of Grover Hill.

Mr. Whitman was born in Mason, Nov. 16, 1849, his parents moving to Grover Hill the following year. He was one of nine children born to Lenard W. and Angeline (Stiles) Whitman.

On May 12, 1883, he married Frances Blake of Milan, N. H., and had three sons, Clyde L. of Grover Hill, Carl who died in infancy, and Evander B. of West Bethel.

Besides his widow and two sons he leaves to mourn his loss four grandchildren, Evelyn, Winfield and Arthur Whitman and Robert Whitman, also one who held the place of daughter in his heart and home, Beatrice (Blake) Andrews. Two brothers are still living, Mellen of Worcester, Mass., and Eldon of Medford, Mass., also one sister, Mrs. Dora Whitman of Salt Lake City, Utah.

Beautiful flowers gave silent tribute to the esteem in which he was held. As he lay so peacefully sleeping among the flowers we seemed again to hear his favorite farewell, "God bless you."

Rev. S. T. Achenbach spoke words of comfort to the bereaved family. Mr. Roberts of Hanover conducted the funeral. Interment was in the Flat Cemetery.

He was borne to rest by his neighbors, N. A. Stearns, True Browne, Maurice Tyler and Fred Mundi.

WHAT THE P. T. A. IS DOING AND HAS DONE

It may seem to some who are not intimately connected with the schools that there is very little to show for the assistance the public has so generously given to the Parent-Teacher Association.

The members of the P. T. A. have worked faithfully and untiringly for the improvement of the school grounds and for articles that would be of help to teachers and pupils.

Below is a list of the articles purchased for the two buildings which have made supervised play easier and playtime for the pupils much happier.

The Grammar Building:

1. A sand pile for the small children.
2. See-saw standard with 3 boards.
3. Swing standard with 3 swings.
4. The wire fence and labor for erecting it along the wall by the road.
5. Two footballs.
6. Two basketballs.
7. One volleyball.
8. Two playground balls.
9. One rubber gas ball (for small children.)
10. Current Events for part of 7th and 8th grades last year.
11. Victrola and ten or twelve records, $61.20.
12. Miss Whiteside was given $25.00 with which to purchase records for a Music Appreciation Course.
13. Magazines for all grades have been purchased since 1922, $62.60.

The Primary Building:

14. Two see saw standards each having 2 boards.
15. One swing standard with 2 swings.
16. One football.
17. One volleyball.

Total for Primary Building, $36.68.

18. There are 67 records bought by the P. T. A.
19. Two given by Mr. Howe.
20. One given by Mrs. E. C. Van.
21. One given by Mr. Harry Jordan.

The Association has paid the repair bills on all apparatus which has amount[illegible]

SCHOOL NEWS

8th GRADE

Those of the 8th grade on the honor list for the week of Sept. 13th:

Barbara Herrick, Kathryn Hosick, Ashley Tibbetts, Wilma Bartlett, Mary Thurston, Charles Jones, Ruth Bennett, Norris Brown, John Tuttle, Robert Littlefield, Wallace Bartlett, Mildred Bartlett.

Those getting 100 per cent in spelling for the week:

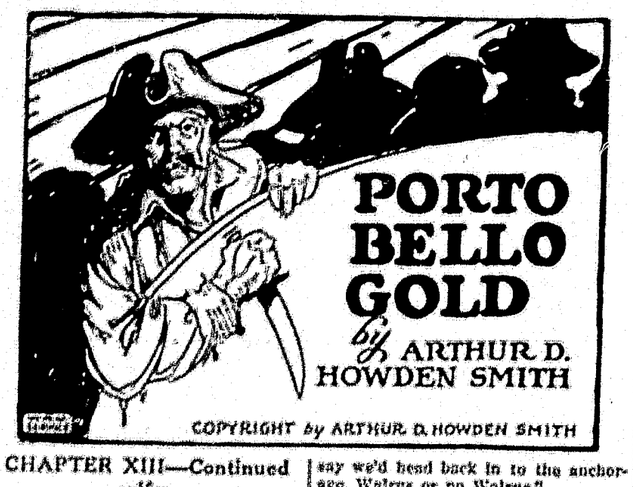
Mildred Bartlett, Ruth Bennett, Shirley Brown, Barbara Herrick, Kathryn Hosick, Mary Lowe, Mary Thurston.

Mr. and Mrs. Frank A. Goddard have returned from a two weeks' vacation.

The H. P. Thurston mill is shut down while a new boiler is being installed.

Judge H. H. Hastings and E. C. Park, Esq., attended probate court at South Paris, Tuesday.

Mr. and Mrs. Fred Bailey of South Paris were recent guests of Mr. and Mrs. Ernest Bisbee.



PORTO BELLO GOLD

By ARTHUR D. HOWDEN SMITH

COPYRIGHT by ARTHUR D. HOWDEN SMITH

CHAPTER XIII—Continued

—13—

"Essentially true," agreed my great-uncle. "I must confess myself ignorant of each single point as why we are here, the excuse for human existence, the relative significance of this world of ours, the utility of the differing qualities of goodness and evil. But any serious consideration, friend Peter, must convince as profound a thinker as yourself that the very existence of men and women is of itself prima-facie evidence that there can be no living Author of omnipotent or exalted powers."

"We better go on deck," said Peter.

"After you," protested my relative as we rose. "'Tis a pleasure to debate with you Peter. Take care, pray! Upon his not removed all of the evidence of Hercule's passing. Strange, is it not, how a lark fellow like Hercule and a man who hath been the president of princes, like O'Donnell, should both be abolished by a simple organic disruption! That seems, Peter, should suffice to disprove the theory of an all-wise Providence. An all-wise Providence, forsooth! Here am I, arranging to reconstruct for the better a most unhappy turn of affairs with consequences bound to improve the wellbeing of the entire world, and my plan is suffered to be placed in jeopardy by an ignorant sailor's fixed shot in the dark! What could be more absurd?"

Peter did not answer him and we passed out upon the main deck, where sailors were busy removing the traces of the Walrus' first broadside which had wrought a certain amount of minor damage and caused the deaths of several men. There was light enough to see about us for the light was of a quality I had never known before a dark, slippery glare with the sea clamped down. The sea was quite flat, and the wind could not intermittent, coming from the quarter of NE x N in the other. Not a star was to be perceived, the entire atmosphere closed us in as if it were filled with the fumes of steel like an evil thing awaiting any fiat commandment. The Walrus lay like Jonah and waited [illegible]

Murray [illegible] a shout and [illegible]

"[illegible] Walrus

"[illegible] Not three feet [illegible] [illegible] [illegible]

GERMANY WOULD BUY MALMEDY AND EUPEN

Dickers With Belgium for Return of Cantons.

Washington. — Belgium considers selling to Germany, according to cable reports, the two border cantons of Malmedy and Eupen.

"If cabled facts in the transaction are correct, this deal in international real estate equals any flights of fancy prices in America," says a bulletin of the National Geographic society from its headquarters in Washington.

"Belgium has been the owner of Eupen and Melmedy for six years. They are both hill towns. The first has 14,000, and the second 4,000 inhabitants, and the whole 382 square miles of territory contains not more than 60,000 people. The wooded countryside offers no such rich agricultural perspective as the fertile Belgian plain farther west. The hills contain no minerals of importance. Yet the tentative price is reported to be 1,000,000,000 gold marks. At current rates of exchange this is equal to approximately $40,000,000, which is a six-year profit any American realtor can appreciate.

Two Towns Near Liege.

"No one of the present generation can forget Liege, so it is easy to locate Eupen and Malmedy by fixing the former 25 miles east, and the latter 25 miles southeast, of that martyred Belgian town. Eupen can almost claim to be suburb of Aix-la-Chapelle, or Aachen, as the Germans call it. From Eupen the Germans stepped across the border on August 5, 1914. Malmedy is farther south along the German-Belgium frontier, which is only 40 miles long. Directly across the line from Malmedy is Spa. Not a spa, but The Spa, whose health springs attracted crowned heads of Europe during the first part of the Nineteenth century.

"At Versailles, in 1918, Belgium wanted 14 cantons in the so-called Eifel district of Germany adjoining the Belgian border. She claimed them as lost Walloon territory taken by Prussia by the treaty of Vienna in 1815. Belgium is half Walloon and half Flemish. The Walloon half is the forested uplands nearest France. Walloon speech resembles French and the religion is Catholic. Flemings, on the other hand, live in the fertile plain, are Protestants, and speak a Dutch language. At one time, Walloon families may have outnumbered all others in 'beyond the border' cantons, but the Germans changed that. Indeed, Eupen, a wool weaving center, is said to be German now but Melmedy, isolated in the hills, is still Walloon.

Five Hundred People Without a Country.

"Neighbor to Malmedy and Eupen is Moresnet, which is a freak of border barter. In neutral Moresnet live 500 men, women and children without a country.

"The town sits over a zinc mine which has been worked for hundreds of years. When it came to laying a border line neither Belgium nor Germany would consent to the other owning Moresnet and its mine. They compromised to create neutral Moresnet. It is not a state, yet it belongs to no one. Moresnet is measured in acres instead of square miles, 1,400 acres, according to one authority, and 800 acres according to another. One year it has a German burgomaster, the next a Belgian burgomaster. Customs revenue is collected by German agents and divided between the two countries.

"Moresnet came near to being overcrowded shortly before the World war because its inhabitants, being citizens of no country, did not have to serve in the army. Belgians and Germans wishing to escape military service flocked to Moresnet until the two godparent countries put a stop to that. A glimpse into Moresnet's economic life is afforded by its taxation policy. Funds to run this village without a country are obtained through subsidy from the mining company and a license on draught dogs!"

Earn $3,250 Hourly

Boston.—Earnings of $3,250 an hour were recorded by the crew of the fishing smack Killaway. Four hours after she cast off from a local pier the ship was headed back with 13,000 pounds of mackeral, a new version of fisherman's luck.

Modify Charleston

New York.—Because the Charleston is too acrobatic it is to be modified by the American Society of Dancing Teachers.

Fair Sued for $24,000 for Slump in Hot Dogs

Camden, N. J.—Leon Ferner a former hot-dog vendor at the South Jersey Exposition grounds here, sued the exposition company for $24,000 damages because, he complained, the hot-dog business at the fair wasn't as good as the exposition directors represented to him and he was forced to close his concession stands after suffering severe financial losses.

He asserted that glowing promises of much trade in the succulent links were made to him by the exposition management, but that the crowds didn't arrive and the hot dogs died on the griddle.

LINCOLN FAMILY FACTS REVEALED

Found in Records of Berks County, Pennsylvania.

Springfield, Ill.—The Lincoln tradition of Berks county, Pennsylvania, reviewed by the recent death of Robert Todd Lincoln, the Emancipator's last surviving child, has caused renewed historical researches into the Berks county records of early days.

Ancestors of Robert Todd Lincoln, it was found, played a leading part in the historical and political affairs of the county during the latter part of the Eighteenth century, one of them serving in the state legislature a few years after the Revolutionary war.

The first Lincolns came into Chester county from New Jersey about 1720. These early arrivals were Mordecai and his brother Abraham.

Mordecai's family comprised four children, Mordecai, Thomas, "Virginia John" and Abraham, born after his father's death. "Virginia John" was the great-great-grandfather of Robert Todd Lincoln.

After the death of Mordecai the four sons moved to Berks county and the county records still show the extent of the influence which the family exerted in the affairs of the county. Mordecai and his wife, Mary, were owners of property in Reading, and Thomas was elected county sheriff in 1758.

The younger Abraham, however, was the politician of the time. From 1772 to 1779 he served as county commissioner. Later he was elected to the state assembly and he represented the county during 1782, 1783, 1784 and 1785.

At the close of the Revolutionary war he was chosen to make an address to General Washington on a visit to Philadelphia. On the original draft of the Pennsylvania constitution of 1790 his signature is found as a member of the constitutional convention from Berks county.

Between the years of 1765 and 1768 "Virginia John," fired by the exploits of Daniel Boone, son of a neighboring farmer, left the county and moved to Virginia. Some years later Abraham, a son, the great-grandfather of Robert, left Virginia for Larue county, Kentucky.

In the meantime a romance had grown up between Abraham and Anna Boone, cousin of Daniel Boone. Their wedding met with rebuke in the little Quaker settlement, and it was not until she acknowledged her error publicly that the disgrace of her marriage "out of meeting" was forgiven.

HE IGNORES $25,000

George Gray, tinsmith recluse, dweller in the railroad yards of Dallas, Texas, ignores a legacy of $25,000 to remain with his soldering tools and his sheet iron shelter tent. The money was left Gray by a former customer and he was told four years ago to call at the county clerk's office to get it. He refuses to go after it, saying he will wait for it to be brought to him. He is still waiting.

Bar Men Dancers

Mantua, Italy.—Men in the province of Mantua have been forbidden to dance in public during summer. The prefect in issuing the prohibition said his action was taken for hygienic and moral reasons.

Listen, Mothers

Philadelphia.—Mothers who smoke, listen to Prof. L. A. Higley of Wheaton college. He believes your children are liable to physical handicaps in early youth.

How Come?

Newport, R. I.—An official description of gems stolen from the home of Cornelius Vanderbilt mentions, in addition to pearls, diamonds and rubies, a "lipstick badly scratched."

Fall Is Fatal

Geneva, N. Y.—Falling several feet off the back porch of her home, Mrs. Minnie Jeffrey suffered injuries which resulted in her death.

A Daniel!

Camden, N. J.—A married man should have one night a week off, in the opinion of Judge Samuel Gray, a bachelor.

WALL STREET PLAYS THROUGH NOON HOUR

Traffic Halts While Clerks Stroll and Gossip.

New York.—Money is king in Wall street, but the people there are far from being the pawns in the continual game which popular conjecture pictures them. They are very human, apparently more so in their hour of relaxation than members of other business groups.

Noon is akin to the proverbial Saturday night in a small town, with only the slight differences caused by custom and environment.

The streets are only canyons between walls of memory, but then the sunlight shines straight down into the voids and its brightness is reflected on the crowds. There are no bustling shoppers here, no persons rushing to appointments or the hurly-burly of business hours. Noon is a time to relax.

All traffic except that essential to the district is diverted at that hour and curbstone boundaries are forgotten.

Walk in Middle of Streets.

Then the statue of Washington looks down on Nassau street, one of the few wide ones, where girls in fours, groups of youths, or here and there a lad and the "girl friend," promenade. Lunch is brief and they saunter about in the middle of the street until the clock strikes one.

It is the same on Wall street itself—which is hardly more than a narrow alley—or on New street, which a wide truck would fill from curb to curb.

There is a sociability about it all, and an excavation for a new building is sufficient attraction for as many persons as can crowd around the guard rail.

Patroling the streets during this time are the hawkers who reap their fortunes in nickels and dimes—newspapers, combs, novelties—anything that strikes the fancy.

The scene is entirely at variance with the activity of the street which makes a million dollars only small change.

Money is a commodity here, and all realize the futility of excessive display, except for the standard "prosperous looking" clothes which are affected both by bank presidents and $20-a-week clerks.

The president and clerk eat side by side in the same lunchrooms, particularly those where you wait on yourself and then figure your own bill.

This action of the banker, however, may be construed as carefulness, as even small sums now are guarded closely. This practice was evolved only recently after a series of holdups.

Take Precaution.

The same boyish looking messengers still carry the little black bags, but the bags are fastened to wrists by handcuffs and chains, making it virtually impossible for them to be snatched away. The kidnaping of the messenger is precluded by the presence of two or three armed guards walking behind him with weapons in hand in coat pockets, while the guards try to look as little like detectives as possible.

This quiet protection marks the street, for about the only visible policemen are traffic officers. For the rest, there is an abundance of plain clothes men and private guards in every establishment.

Snakes Kill 19,308 in British India in Year

London.—Snakes were responsible for the deaths of 19,308 people out of 21,811 who were killed by wild animals in British India during 1925.

According to annual returns the number of deaths attributed to accidents by wild beasts is 1,074, of which 975 are accounted for by tigers and the rest by wolves, bears, leopards, elephants, wild pigs, crocodiles and hyenas.

The number of snakes destroyed totaled 41,004 and wild animals, 21,065, the latter including 4,600 leopards and 1,000 tigers.

Ananias Unknown as Liar in Home Land

Damascus.—Every American who comes to Damascus is told: "Don't fail to visit the house of Ananias."

One feels that he cannot leave Damascus without calling on the patron of prevaricators.

He occupied a fine house, as houses in Damascus go, and must have been a prosperous old gentleman.

"Did he have any other profession besides that of a liar?" a guide was asked.

"Lawyer? He was not a lawyer; there were no lawyers in those days," the guide who learned his English in England replied reproachfully.

"Liar! Liar!" was the emphatically repeated query.

"Sah! I done told you once" came back the Anglo-Syrian with a look of intense surprise. "Why, this man is not known because he was a liar, but is the man who converted Saint Paul."

They never have heard of Ananias the liar, in this part of the world.

Community Building

Duty of Citizens to Work in Association

The city would profit greatly from a cultivation of the spirit of neighborhood pride, to keep their own premises in order, and beautiful, and also to work in association with one another to beautify the entire neighborhood in accordance with an agreedon plan, says the Indianapolis News. A great deal could be done in this way through private effort, and in the doing of such a work in such a way we should learn to value more than we do now individual initiative. Also there would be a development of neighborhood spirit which would make for better citizenship.

It ought not to be difficult to organize—in as loose a way as might be thought desirable—neighborhood associations for the carrying out of what is as much a neighborhood as a municipal purpose. The coming together of neighbors to consider ways and means and methods would itself be helpful. It would be worth much for the citizen to realize that he is not dependent on government for everything he wants, and to discover that there is a great deal that he can do for himself. But, of course, beauty is the prime object to be sought, a beauty that would undoubtedly spread from neighborhood to neighborhood. Perhaps there are such associations already. There can hardly be too many of them.

"Get Together" Spirit Builds Up Community

There are little communities dotted here and there all over our vast country which are dull and uninteresting because they are a mere aggregation of individuals and not a community, as such. "A real community is a number of people so united in spirit and so interested in the advancement of their town that they are willing to drop their little differences and unite to form one great brotherhood."

If your town is dull it is because there is no organized effort to overcome that dullness. If the people who go about bemoaning the barrenness of life in the rural districts would just meet together and in a sane, hearty way face the proposition, they would discover avenues of development of which they never dreamed. Wherever there are three or four families in a group there is almost invariably talent which will make for the welfare of all concerned. No community appreciates its resources until it places the social emphasis on its community life. Unsuspected talent is displayed when team work is adopted. Men and women who have never been tested are drawn out by the inspiration of doing something in common with others.—Marion Dallas in Montreal Family Herald.

Neighborhood Enterprise

There is no reason why the citizen should look to the city government to do everything for him. It is doing much as it is perhaps too much. People residing in a certain stretch of street—say a few blocks in length—could easily, and at low cost, through combined action, make the whole neighborhood, both inside and outside the property line, beautiful beyond anything now imagined. Other neighborhoods would be quick to follow the example, and the whole city would be the gainer. The streets thus improved and cared for would be more desirable than they are now, residence in them would be sought and prized, and as a result property values would advance.

From whatever point of view the matter is looked at, the effect would be good.—Indianapolis News.

Eye to Property Value

People who are most vociferous in their appreciation of the sentimental values of their homes, who let it be known to all and sundry that they would never sell their home because of old associations, are frequently the readiest to sell if they get what they call a "good offer." They are really good salesmen, and their boasted affection for their homes is merely good sales talk. While this attitude may be a trifle callous, there are few of us who do not keep a weather eye upon real estate values. We are proud and pleased when there is a "boom" in our immediate neighborhood. And rightly so. We are pleased whenever the property value of our home advances, because it has materially increased our potential estate, and proud that our purchase has proved to be a wise investment.

Protect Home Investment

It is indeed curious that, while we avoid, in so far as we can, any depreciation of our other investments, many of us do not adequately protect our home investment. We are constantly paying "neglect taxes" on our properties, which may be greater some years than the government taxes. Some idea of the extent of our carelessness may be gained from the knowledge that repairs to property due entirely to neglect, cost American property owners about $1,000,000,000 a year. This truly appalling figure indicates a very deplorable condition. It is a sum nearly four times as great as the annual fire loss.—Exchange.

The School Lunch

School children need something hot for their lunch. What is easier to prepare than a vacuum bottle of rich, steaming Monarch Cocoa? With Monarch Teenie Weenie Peanut Butter sandwiches it makes the ideal meal.

Characteristic

Novelist Booth Tarkington said at an Indianapolis tea:

"Character will out. It shows itself in all circumstances. The novelist remembers this truth and profits by it.

"A Scotchman was playing golf with his son, Ian. The old man got badly bunkered. Ian, on the other hand, had only one to play to win the match.

"'Ian,' said the old fellow.

"'Yes, father?'

"'Isna the morrow yer birthday?'

"'Yes, father.'

"'Aweel,' said the old man, 'I'll gie ye that hole for a present.'"—Detroit Free Press.

Watch Cuticura Improve Your Skin. On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful what Cuticura will do for poor complexions, dandruff, itching and red, rough hands.—Advertisement.

Lost His False Teeth

When Burlington passenger train No. 43 arrived at Alliance, Neb., several minutes late recently, William Zollinger, conductor, handed in the following report of the delay at divisional headquarters: "Ten minutes delay looking for false teeth." Zollinger's teeth fell out of a window when he sneezed. Stopping the train by a sudden jerk of the air cord, he searched ten minutes in vain for them.

FIRST to adopt DUCO

THE General Motors Research Laboratories cooperated with E. I. du Pont de Nemours & Company, Inc., in the development of Duco—an achievement ranking in importance with the invention of the self-starter.

DUCO is not only far more lasting than paint and varnish; it is finer, more beautiful and more economical to apply in factory production.

DUCO was first adopted by Oakland, and immediately thereafter by the rest of the General Motors cars.

BUYERS of General Motors cars have profited by the development of this finer, more enduring finish. Their cars wear well longer.

GROVER HILL

The community was greatly shocked at the sudden death of Albert L. Whitman early Friday morning.

Mr. and Mrs. E. C. Barnard from Bellows Falls, Vt., are enjoying their annual vacation with Mr. and Mrs. M. P. Tyler at the farm.

Mr. and Mrs. M. M. Whitman and family from Worcester, Mass., were called here by the death of his brother, Albert Whitman.

Mr. and Mrs. Frank Whitman from Chatto were recent guests in town.

Mr. Payson Philbrick, who has been ill, is improving.

Mr. and Mrs. Alfred Blake, Mr. Elsworth Blake, Mr. G. A. Blake, Mrs. Mary Blake and daughter from Milan and Berlin, N. H., were in town to attend the funeral services of their brother in law, Albert L. Whitman.

Mrs. Blanche Blake and daughter, Miss Helen Blake, of Portsmouth, N. H., were called to Bethel, Friday, by the sudden death of Albert L. Whitman.

Mrs. Fred A. Mundt and son, Ernest Mundt, visited friends in Island Pond the week end.

Mr. A. H. Hutchinson from Bethel was a recent guest at the home of his son, W. H. Hutchinson.

Messrs. Roberts and Barker from Hanover were in the place Monday to conduct the funeral of Albert L. Whitman.

NORTH PARIS

Billy Andrews is visiting his uncle, A. D. Andrews, and will attend the County Fair.

Mr. and Mrs. A. D. Littlehale visited in Winthrop last week with his sister, Mrs. W. J. Bonney.

Mr. A. D. and W. H. Littlehale are cutting cordage in the neighborhood.

Mr. and Mrs. Chester Barlow and three children and Mr. and Mrs. Dean Bamford and son visited Mr. and Mrs. William Littlehale, Sunday.

Mr. Charles McKenney is very low at this writing.

Wife and Husband Both Ill With Gas

"The pains I had gas on the stomach. The first dose of Adlerika helped. I now sleep well and all gas is gone. It also helped my husband," (signed) Mrs. H. Buckley. ONE spoonful Adlerika relieves GAS and often brings satisfying relief to the stomach, stops that full, bloated feeling. Brings out old, made matter you never thought was in your system. Adlerika is wonderful for chronic constipation. W. H. Hutchinson, Druggist.

CHURCH ACTIVITIES

METHODIST CHURCH

Rev. Chester B. Oliver, Minister

Worship Hours at the Methodist church: On Sunday there are four services:

Church School at 9:45 A. M.

Morning worship at 10:45 A. M.

The Epworth League, 6:15 to 7:15 P. M.

Sunday evening worship at 7:30.

On Tuesday evening: Class-prayer meeting to which all are welcome as on Sunday. Time, 7 o'clock.

The music committee give special music morning and evening on Sunday. Next Sunday is Rally Day in the Sunday School. Nine juniors will graduate into the Young People's Department. Other departments will advance their pupils. We seek strength from worship by prepared order of services and everyone lifting together, pulling together, praying together. Next Tuesday night our Sunday school will nominate two delegates to the County Convention at Rumford if this cannot be done on Sunday. The two delegates to Winthrop will give their report at the Rally hour on Sunday. All meet in the Young People's Department Room. The ministers desires to speak Sunday morning and evening on subjects related to the first Rally programs. The two subjects are:

1. The Price of the Worthwhile.
2. The Value of the Possessive Pronoun in Religion.

Mrs. Oliver will speak at the Church School Workers' Conference on Tuesday evening. The women are especially invited as well as the men.

League social Thursday. All young people invited, 7:30 o'clock.

Choir rehearsal at Trafton's house Friday evening. All meet at the church. Cars will be provided. Time, 7 to 7:15 at the church.

The ladies' Aid meets with Mrs. P. E. Ingham, Thursday.

CHRISTIAN SCIENCE SOCIETY

Chapman Street

Services Sunday morning at 10:45. Subject of the lesson sermon, Reality.

Sunday School at 10 o'clock.

Wednesday testimonial meeting at 7:30 P. M.

UNIVERSALIST CHURCH

Rev. Charles Hutchinson, Pastor

Next Sunday, Sept. 26th, at 10:45 o'clock, Rally Day.

Sermon subject, "WE HAVE THY COMMANDMENT EXCEEDING."

Special Choir by church choir and Miss Ruth Bean.

Bible school at 12 o'clock.

Rally Day Exercises for Young People and Juniors.

Miss Gertrude Hale, superintendent of the Primary and Nursery School, will be present and will speak to the children.

Miss Ruth Bean is to be pianist for the morning.

Wednesday at 7 o'clock, subject, "The Right and the Treasure."

Our school Methods and Organization. Service of 7 o'clock, subject, "Make Christ the Pattern."

On Wednesday, Sept. 29th, there will be a special meeting of the ladies of the church and the Rev. Gertrude Hale will be the speaker of the evening. It is hoped that every lady of our church will avail themselves of the opportunity of hearing what Miss Hale has to say. Some of you know her and we also do not call a lady unless we get a lady that will help us.

CONGREGATIONAL CHURCH

Rev. C. F. Aylesworth, Pastor

Tuesday, Sept. 28, 2 o'clock. Meeting of the ladies' club with Mrs. Virginia Frost.

Sunday, Sept. 26:

10:45 Public worship, the pastor preaching.

12:00 Church school.

7:00 Evening service. Subject of sermon, "The Pulpit in the Evening."

Accorded Right of Way

A Minnesota judge ruled that cows are the right of way. Every cow in Kansas that Buckingham Ape found

THE J. E. JONES LETTER

(Continued from page 5)

suit of this generosity by our Government, the Indians today are an economic, artistic and intellectual asset to our national life."

COMPULSORY AUTO INSURANCE

There is a widespread movement throughout the Nation demanding the enactment of laws that require motor car owners to take out liability insurance to provide adequate compensation for victims of reckless driving. The opposition to the plan comes from insurance companies and motor interests, but the urgent need for such protection for the public is rather generally held to more than offset the objection. There are so many hit and run cases and so many other instances where irresponsible and reckless drivers inflict bodily and material damage that the popular desire is to have "something done about it."

BUFFALO

Forty years the largest herd of buffaloes the American continent was less than thirty head. Twenty years ago there were two thousand buffalo. Now the population of the bisons of the world has jumped to twenty thousand. An enterprising Westerner who bought one lot of Government buffalo last year has advertised that he is going to have an old fashioned buffalo hunt on the prairie, and he proposes to invite the greatest sportsmen of America to participate. A few days ago the United States Dept. of Interior announced another sale of buffalo, and anyone who is willing to put up from eighty dollars to eighty five dollars to pay the cost of capturing and transporting a buffalo from Gardner, Montana, can obtain one of the animals to use as a pet or for any other purpose that they may desire.

CARRYING GUNS

There are many State laws regulating the sale of fire arms, but anyone who wants to get a revolver has only to write to a mail order house and it will come along, with no question asked. In all probability there will be legislation upon this subject at the coming session of Congress.

Thinly shaved raw celery improves many dishes, such as creamed beef, fish, calf meat, oysters, potatoes, cabbage, hard boiled eggs. Try it in cream sauce for serving on cooked fish, with scalloped potatoes and other vegetables, and just a few minutes before serving time.

ANDOVER

Mrs. Annie McAllister has been entertaining her niece, Mrs. George Dickey, and husband from East Milton, Mass.

Mrs. William Boulter and daughter of Rangeley were guests of her mother Mrs. Emma Pratt, during the Fair.

The Ladies' Aid furnished a baked bean and pastry supper in the hall, Saturday evening with a good company present.

Mr. and Mrs. Samuel Poor and children who have spent the summer at their summer home in town, returned to their home in Akron, Ohio, Monday.

Mr. and Mrs. Edgar McNeil of Upper Dam were guests of her parents, Mr. and Mrs. John Hewey, during the fair.

Mrs. Annie Coolidge, who has been working for Mrs. Samuel Poor, returned to her home in Dixfield, Tuesday.

Mrs. Willard Newhall, who has been visiting friends in town, returned to her home in So. Portland, Sunday.

Lone Mt. Grange will hold its regular meeting in the hall Thursday evening.

Mr. and Mrs. Alfred Poor and daughters, Mrs. Herbert Stone, Mr. Stone and son, Charles, of Kansas City are visiting his brother, Henry L. Poor.

Winslow Rand, who is attending Hebron Academy, spent the week end with his parents, Mr. and Mrs. C. A. Rand.

Rev. Mr. Renfrew preached an interesting sermon at the Congregational church Sunday morning from the text, "Losing Jesus."

There were moving pictures at the McAllister Theatre last week that were much enjoyed.

A number of the townspeople attended the fair at Newry, Saturday.

The Andover fair was postponed Thursday morning until Friday on account of the rain. Friday was cloudy part of the day and the fair was well attended. Mr. Winslow of Bethel had a side show of two freak calves which attracted much attention.

Mr. and Mrs. George Glover of Canton were guests of his sister, Mrs. Verd Perkins, and family last week.

Mrs. George M. Newhall and brother, Mr. Reeves, who have spent several weeks at their summer home, "the Wayside Cottage," So. Andover, returned to their home in Germantown, Pa., this week.

Mrs. Lucinda Bristol and daughter, Naomi, from Bridgton visited her mother, Mrs. Abbie Marston, recently.

Mrs. Harold Hodsdon of Lynn has been a guest of her parents, Mr. and Mrs. Frank Newton.

Mr. and Mrs. Ralph Thurston and Miss Ivy Thurston spent Sunday at their camp on Silver Lake.

STICKING BUTTER

To keep butter from sticking to paddles and other wooden utensils these should be thoroughly rinsed immediately before using, first with hot water, then with cold water. This fills the pores of the wood with water and prevents the butter from sticking to it. Wooden utensils should be cleaned immediately after using so that the fat will not have an opportunity to get into the pores of the wood.

Your Indigestion quickly relieved by the reliable "L. F." Atwood's Bitters

Acid Stomach, Heartburn, Belching, Pains from Gas Pressure, are quickly relieved by a teaspoonful of the good old "L. F.'s" taken in a cupful of hot water.

It is better to avoid the causes of these distressing symptoms. Eat sparingly. If over-tired, eat slowly, chew your food well, don't over-eat, but if you are suffering from indigestion, you can rely on "L. F." ATWOOD'S BITTERS. It's safe and sure if you are inclined to constipation or biliousness.

This old-time preparation of roots, barks and herbs has brought health, comfort and happiness to many thousands of sick people during the past 76 years.

Get a Bottle today. 60 doses 50c. Trial size 15c.

Increase of Freight via Panama Route, Largely Due to Oil Shipments, Indicates Rise of United States to Leadership of World's Commerce.

By JUDSON C. WELLIVE

One of the striking evide America's rapid rise toward cial and industrial leadership world, is the Panama Canal, most certainly handle more fr 1926 than will Suez. For severe the two canals have been in and neck competition whose tions are the more interest cause the Panama ditch is ow the American Government, a at Suez by the British Govern

Of course both Canals are the ships of all nations; competition between them is between the United States a ain, but in a larger and eve significant view it is competit tween old world and new worl

When the Panama Canal wa ed in 1915, Suez was already ing about 23,000,000 tons of annually. Almost nobody b Panama could ever attract a approaching such a volume lng the war fear of German rines in the Mediterranean many vessels to take the route between the far east a ropean or American ports. Th Panama its introduction and not only held but greatly in its business since the war. Panama transited 5037 against 4621 for Suez: Panam did 35,160,000 cargo tons agai 770,000 for Suez. This was th year of Panama's lead.

A Close Race

The following year Suez ba ceeded Panama's tonnage; a 1925 comfortably held its lead. reports for 1926 to date indicat Suez is losing, owing to Britai dustrial depression, while Pan doing better and is pretty cert resume the lead.

The present Suez Canal ha in operation nearly sixty years ama only eleven. Although fe ple except antiquarians know first canal at Suez was built than 3,000 years ago. It was eration as early as B. C. 1350; long before, is mere conjecture fore the Christian era began the had been built, destroyed, r silted up and built up again, after time. When Alexande Great conquered Egypt the al was one of the oldest of steering works.

Between 1904 and 1915 the p Panama Canal was constructed cost about $400,000,000. Suez one-fourth that sum. But Suez simple, sea level ditch across a plain; while Panama is a lock The greater part of its length 85 feet above sea level, so that of the distance from ocean to is through an artificial fresh lake.

Early Profits Unexpected

When Roosevelt started bu at Panama, neither he nor any prophet of optimism would dared suggest that within its decade the Canal would earn a its chief justification concerned national defense, and the estab ment of competition with the transcontinental railroads.

Although both Canals are ope shipping of all nations, British sels constitute the majority of using Suez 15.5 per cent., American vessels are 14.5 per ce those using Panama.

For 1924, ships of 21 nations

U.S.S. PENNSYLVANIA AT CHAGRES RIVER CROSSING

Increase of Freight via Panama Route, Largely Due to Oil Shipments, Indicates Rise of United States to Leadership of World's Commerce.

By JUDSON C. WELLIVER

One of the striking evidences of America's rapid rise toward commercial and industrial leadership of the world, is the Panama Canal, will almost certainly handle more freight in 1926 than will Suez. For several years the two canals have been in a neck and neck competition whose implications are the more interesting because the Panama ditch is owned by the American Government, and that at Suez by the British Government.

Of course both Canals are open to the ships of all nations; and the competition between them is not only between the United States and Britain, but in a larger and even more significant view it is competition between old world and new world.

When the Panama Canal was opened in 1915, Suez was already transiting about 23,000,000 tons of freight annually. Almost nobody believed Panama could ever attract anything approaching such a volume. But during the war fear of German submarines in the Mediterranean caused many vessels to take the Panama route between the far east and European or American ports. This gave Panama its introduction and it has not only held but greatly increased its business since the war. In 1923 Panama transited 5037 vessels, against 4021 for Suez; Panama handled 25,160,000 cargo tons against 22,770,000 for Suez. This was the first year of Panama's lead.

A Close Race

The following year Suez barely exceeded Panama's tonnage; and in 1925 comfortably held its lead. But reports for 1926 to date indicate that Suez is losing, owing to Britain's industrial depression, while Panama is doing better and is pretty certain to resume the lead.

The present Suez Canal has been in operation nearly sixty years, Panama only eleven. Although few people except antiquarians know it, the first canal at Suez was built more than 3,000 years ago. It was in operation as early as B. C. 1350; how long before, is mere conjecture. Before the Christian era began the ditch had been built, destroyed, rebuilt, silted up and built up again, time after time. When Alexander the Great conquered Egypt the Canal was one of the oldest of engineering works.

Between 1904 and 1915 the present Panama Canal was constructed. It cost about $400,000,000. Suez about one-fourth that sum. But Suez is a simple, sea-level ditch across a sandy plain; while Panama is a lock canal, the greater part of its length lying 85 feet above sea level, so that most of the distance from ocean to ocean is through an artificial freshwater lake.

Early Profits Unexpected

When Roosevelt started building at Panama, neither he nor any other prophet of optimism would have dared suggest that within its first decade the Canal would earn a profit. Its chief justification concerned the national defense, and the establishment of competition with the transcontinental railroads.

Although both Canals are open to shipping of all nations, British vessels constitute the majority of those using Suez 15.5 per cent), while American vessels are 54.5 per cent of those using Panama.

For 1924, ships of 31 nations used the Suez route, while 24 nations were represented in the maritime caravan at Panama.

The World War was not the only unexpected factor in bringing Panama so quickly to equality with Suez, nor the most important. The enormous increase in Panama traffic in 1923 was represented almost entirely by petroleum and its products, moving from California to the east coast and Europe. In the year ended June 30, 1924, tolls aggregating $24,290,000 were collected, of which $9,071,003 was from tankers carrying petroleum. An even more striking statement of the matter is that for the same year exactly 50 per cent of all tonnage through the Canal was between the two ocean fronts of the United States, that is, 13,500,000 tons; and of this, considerably over 9,000,000 tons, or more than two-thirds was petroleum. It was of course chiefly from California, en route to eastern refineries. In the succeeding year this petroleum movement fell off heavily; but for 1926 it is again increasing and the increase is likely to continue for many years. But for the petroleum traffic, the Canal would have shown a deficit in every year of its operation.

The enormous petroleum business has been in other ways advantageous to Panama. A constantly increasing proportion of maritime shipping nowadays uses oil fuel. Oil-burning ships seek routes on which they can most cheaply buy oil; and because California oil can be put as cheaply into the bunkers of vessels passing through the Panama ditch, there is a substantial inducement to prefer this route. This will increasingly favor Panama and militate against Suez, as the number of oil burners increases. Moreover, Panama's advantage will still further increase as the enormous oil resources of Venezuela, Colombia, and other South American countries are developed.

Great Service of Panama

If cheap petroleum has thus served Panama so well, Panama in turn has equally served the American motorist, who consumes most of the world's petroleum products. For Panama has brought the Pacific Coast petroleum to the eastern market at costs which, but for the Canal, would be vastly greater. Thus the Canal has given the United States the cheapest petroleum products in the world, and helped build the automobile industry and our modern highway system.

This mutually helpful relationship between the Canal and the petroleum users is the more impressive when one realizes that it was not even remotely anticipated at the time President Roosevelt started building the Canal. So late, indeed, as 1910, when Admiral Evans wrote his articles about the Canal and decided that it could not be profitable for several decades at least, he based all his calculations on the probable cost of coal for bunkering ships. He did not dream that merchant marines were on the verge of the revolutionary change from coal to oil. So he figured that, as there is practically no bunker coal in the countries bordering on the Pacific, that ocean could not compete, by way of Panama, for a greatly increased share of shipping. The oil development overturned the prophecies of Admiral Evans, and of all others who had foreseen that fuel problems would make Panama unprofitable.

WEST PARIS

Dr. and Mrs. Edwin Kay are entertaining Mrs. Kay's sisters, Mrs. Louis Bremer and Mrs. Arthur Green and their three children of Montreal.

There was a quiet wedding at the home of Mr. and Mrs. Eben Pike on Sunday, Sept. 12, when Mrs. Pike's sister, Miss Frances Ireland of Bangor, was united in marriage with Wilbur A. Smith of Palmyra by Rev. E. H. Stover, the double ring service being used. Janice and Dallas Pike, twin daughters of Mr. and Mrs. Pike, were ring bearers. Mrs. Packard, another sister of the bride, and husband of Dover-Foxcroft, were matron of honor and best man.

Miss Marion Towne of Kennebunk, superintendent of the grades, and Miss Dorothy Downing, teacher in the high school, are boarding at H. L. Patch's.

Miss Lydia Ross, R. N., is caring for Mrs. Sarah Devine, who is in very feeble condition of health.

Mr. and Mrs. Abner H. Mann are spending ten days in Massachusetts.

Ralph Bacon is soon to build a bungalow on the new cross street between Church and Maple.

Miss Ella Curtis has returned from a two weeks' visit with Mrs. Dean Wheeler and family at Oakland.

Mrs. Flora C. Ellingwood and Walter L. Bryant of Woodstock were married at the home of Rev. O. D. Cardy at So. Portland, Sept. 10th. They were accompanied to Portland by Mrs. Annie Willis and Mrs. Freeland Herrick, and Herman Barnett was chauffeur. After the ceremony they visited the institute for the blind, which was of interest to both, as they have defective eyesight. Mr. and Mrs. Bryant will live on Mrs. Bryant's house on Main Street. They have the best wishes of many friends.

Mrs. Walter Ring has recently entertained her aunt, Mrs. N. R. Pearson, of Norway, and her cousin, Mrs. Herman Castner of Randolph, Maine.

Rev. George W. Hinckley from Good Will Farm preached at the Universalist church Sunday in exchange with Rev. Eleanor B. Forbes, who spoke from his pulpit, going from there to Pittsfield to attend the Universalist state convention.

Azalia, daughter of Mrs. Annie Rowe, is recovering from a recent operation on her throat and nose.

Mrs. Walter Ring and mother, Mrs. Kendall, have recently entertained Mrs. Ring's aunt, Mabel Kendall, from Newfields, N. H., and her friends, Mr. and Mrs. Demeritt and Miss Mabel Demeritt of Penn.

Mrs. Libbie Emery has recently received a card from her brother, J. Holland Morse, of South Paris.

Miss Jennie Cummings has closed Langdon Lodge, Ridge Crest, after a week of several weeks to stay in Cape Elizabeth.

Mr. and Mrs. Guy A. Smith, to Mt. Vernon and Belgrade, of last week.

Miss Annie Haggett was the guest Wednesday of her parents, Mr. and Mrs. Walter Chandler, of So. Paris.

Mrs. Elenor Berry is keeping house for E. J. Mann during Mrs. Mann's vacation.

Howard Emery has returned to his teaching at Hebron Academy.

Mr. and Mrs. Everett Holden and daughter, Gertrude, of Mechanic Falls were calling on friends recently.

Mrs. Lena Herrick left Friday morning for Los Angeles, Calif., to attend the international W. C. T. U. convention. She is a delegate.

The West Paris base ball boys have won the silver cup for two consecutive years in the Pine Tree League, were given a banquet at Grange Hall Thursday evening. The boys and their friends made nearly sixty guests at the table and nearly a hundred more took supper. Music throughout the supper and for the dance which followed. The speakers were Ronald Partridge of Norway, Principal Foster and J. H. Neal of South Paris, D. H. Duffield, H. H. Garnsey and several of the ball team.

LOCKE'S MILLS

Mrs. W. B. Bond and son, Elton, motored to New Haven, Conn., last week and returned home with them.

Mr. William Perham was called to Massachusetts by the sudden death of his brother, Nicholas.

Rural Mail Carrier Stanley Morton visited relatives at Auburn the week end.

Mr. and Mrs. F. E. Stowell are visiting their daughter, Mrs. Lincoln Herrick, on Jefferson, Me.

Mr. and Mrs. Ring Rankin and family are moved to Newry last Saturday.

Mrs. Nell Moody is a guest of relatives at West Paris.

EAST BETHEL

No school Wednesday, Sept. 22, on account of the County Fair.

Several from here attended Andover fair, also the fair at Newry Corner.

Mr. Insley J. Young of East Weymouth, Mass., formerly of Bethel, was an over night guest of Mr. and Mrs. J. L. Holt, and called on his many old time friends who were pleased to see him.

Mrs. Irving Kimball of Auburndale, Mass., is spending several weeks vacation at her home here and at her camp, Outside Inn, Locke's Mills.

Mr. and Mrs. F. A. Hamlin of Bethel village were recent callers here.

Mr. G. K. Hastings, Mr. and Mrs. Wm. S. Hastings and Robert Hastings motored to South Paris and return Sunday. They were guests of Mr. and Mrs. E. O. Millett.

Mr. and Mrs. Tucker and Mr. G. M. Bartlett of Gardiner were Sunday callers of Mr. and Mrs. Porter Farwell and family.

WEST BETHEL

Mr. and Mrs. Ervin Hutchinson and Mr. and Mrs. Clarence Bennett and daughter, Margaret, were in Canaan, Vt., Monday.

Mr. and Mrs. Fred Scribner of Albany were callers at Nahum Scribner's, Sunday.

Gerald Cushing and Franklin Burris went to Lewiston, Monday, where they will enter Bates College as freshmen.

Floyd Mason left Tuesday for Waterville where he will resume his studies at Colby College.

Mr. and Mrs. Clayton Kendall are rejoicing on the birth of a son Monday, Sept. 13th.

Miss Mabel Seamen of Massachusetts is visiting Mr. and Mrs. Fred Ordway.

SOUTH WOODSTOCK

Deferred

Recent visitors at A. R. Hendrickson's were C. O. Perkins of Richford, Vermont, Edward Perkins of Wilton, Me., and A. J. Verrill of East Providence, R. I.

Among those who attended the Whitman family reunion Sunday at the home of Mr. and Mrs. Frank Perkins at Andover were Mr. and Mrs. A. R. Hendrickson and daughter Mary, Mr. and Mrs. Alvah Hendrickson and three children, Mr. and Mrs. Harry Stiles and son, Mr. and Mrs. Everett Harlow and children, Mr. and Mrs. Clifton Wilson and family, Mr. and Mrs. Walter Lot of Lake and family.

KINEO RANGE

WEEK AT

D. Grover Brooks', Bethel

OCTOBER 11 to 16

A 32 Piece Dinner Set with the purchase of a KINEO Range made during the week of Oct. 11-16 **FREE**

Furthermore—during the week of October 11 to 16 inclusive

EASY PAYMENTS, IF DESIRED

may be arranged

Always a good buy—this makes the Kineo a better buy than ever.

Why A Kineo?

We know many KINEOS built in the Eighties that are in Maine Kitchens this year of 1926—and giving satisfaction.

They are known as OLD FAITHFUL—and that is just what they are—FAITHFUL in Baking, Cooking and Heating, Economically. A Kitchen PAL and a good one.

The 1926 KINEO is of the same high quality materials and workmanship. They have every improvement that really improves. With a minimum of "filigree work" every KINEO looks good.

What with such excellent KINEOS—such a wide variety to choose from—the privilege of easy terms (about as easy as they make them)—and a 32 piece Dinner Set FREE—the week of

OCTOBER 11 to 16 is a *good* time to buy a KINEO

RADIO

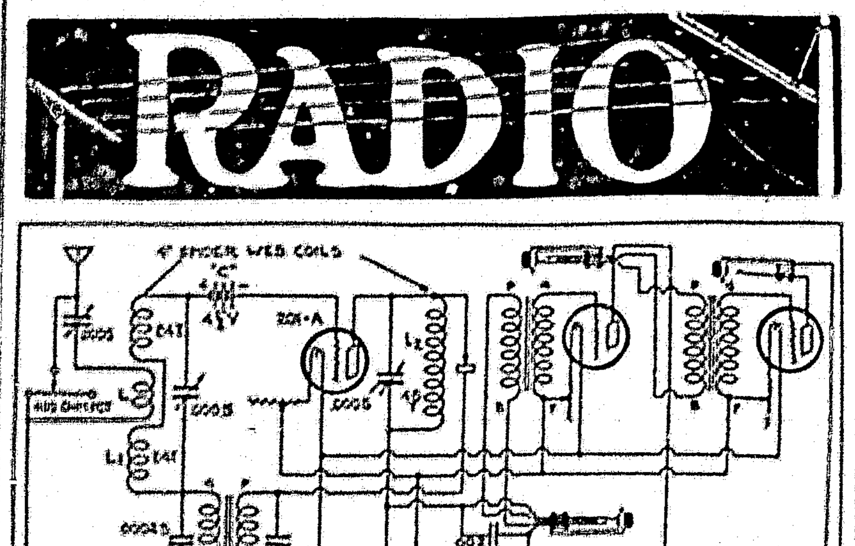

Diagram of a Three-Tube Reflex Hook-Up With Constants Being Shown. Summer Static Is Reduced to Practically Nothing.

The principal feature of the circuit shown, which is of my own origin, writes William L. Travis in Radio Digest, is that summer static is reduced to practically nothing. Yet, the signal strength is greater than any of several regenerative sets that I have tried. This I think, is due to the variable resistance in the aerial circuit. Its selectivity is as good as a well made five-tube, tuned radio-frequency set while its DX record is as good as any neutrodyne. When properly adjusted and tuned to any wave length, I have found its tone quality to be superior to any set I have heard.

The only time I am annoyed with other disturbances is when an electrical storm is within a radius of five miles. Ordinary static, while very annoying on radio-frequency or regenerative circuits, is not troublesome on this one.

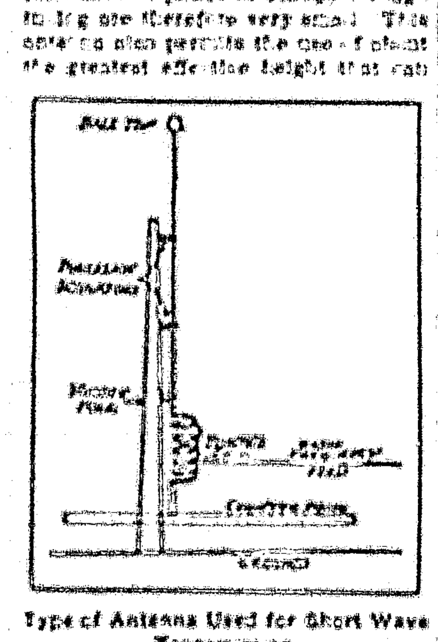
The potentiometer shown is of 400 ohms resistance. Only the arm and one of the end terminals are used. Coils L and L1 are spider webs. Twenty-four turns of the secondary are wound on, then the primary of 10 turns, and finally the remaining twenty-four turns of the secondary. Both coils are wound clockwise, and both are No. 22 double silk-covered wire. The crystal detector may be either fixed or variable. When the variable condenser in the aerial circuit and the potentiometer are adjusted to the aerial being used they can be left alone, which leaves only two controls to tune. The potentiometer may be used as a volume control and to control oscillation.

New Upright Antenna Used by Station KDKA

At either side of station KDKA, Pittsburgh, stands an antenna [illegible] one of the new upright [illegible] and the other of the conventional horizontal or flat top structure, also used for short wave transmission. The [illegible] designed broadcasting wave length, the [illegible] on the North American continent, although it is heard regularly in parts of South America and Europe. The other [illegible] with consistent day after day transmission to the furthermost corners of the earth.

One of these antenna systems is for the station's [illegible] meter wave length while the other radiates on the short wave lengths.

The upright antenna, the one used with the short wave transmitting set, is one of the most efficient antenna it is possible to build of any type considering the present knowledge of radio phenomena, KDKA engineers declare, as it has been practical to build this antenna so that its natural period of vibration or fundamental frequency is very close to that used in the short wave transmissions to be radiated from it. That means that very little [illegible] of the antenna is required and the losses of power or energy through [illegible] are therefore very small. This antenna also permits the use of about the greatest effective height that can



Type of Antenna Used for Short Wave Transmission

be obtained on the particular wave length in use.

A wooden pole supports a pipe out [illegible] for the insulation of the [illegible] as shown. The pipe is supported on [illegible] porcelain insulators and is topped with a large ball. A [illegible] is used instead of a [illegible]. The antenna is fed through a radio-frequency transmission line so that the antenna can be located at some distance from the transmitter itself.

The [illegible] of assigned wave length antenna also is very efficient. The fundamental frequency, however, is not quite so close to that of the wave length which is to be radiated. [illegible] of height. This is because of the type of support used for the antenna, a type which has many advantages over steel to compensate for the added height possible through the use of steel supports.

[illegible] short wave transmitting station [illegible]

[illegible] consists of a [illegible] antenna [illegible] a high wooden [illegible] about [illegible] feet from the ground [illegible]

The length of the short wave radiation by the station expressed in feet is approximately 200 feet. The antenna is a few meters less than half the length of the wave which it radiates, but a short horizontal counterpoise element at the bottom end of the tube, and the lead-in wire connecting with the set, help to compensate for the deficiency in length, and bring the natural period or fundamental frequency of the antenna near that which is being radiated by the transmitting apparatus.

Collodion Is Found Best Binder for Radio Coil

When winding tuning coils it is necessary to use some kind of a binder. The radio laboratory of the bureau of standards would recommend collodion for that purpose. Comparative tests with varnish, shellac, and paraffin produced results indicating that collodion is best, with the additional advantage of drying rapidly.

Different binding materials were applied to a single-layer coil, just enough to cover the entire surface. The coils were then dried thoroughly. Since measurements were difficult, unusual care was exercised in performing the task. The difficulty of this test is apparent when we are told that in some cases the resistance of a coil using a binder was less by a fraction of an ohm than a coil to which no binding material was applied. Generally, however, the use of a binder contributed to the "low loss" characteristics of a tuning coil.

Various binding materials showed varying resistance at different radio frequencies. Examples are quoted. At [illegible] kilocycles, a coil with no binder offered a resistance of [illegible] ohms, collodion, [illegible] ohms, commercial insulating varnish B, 30 ohms, commercial insulating varnish A, [illegible] ohms, shellac 37 ohms, paraffin [illegible] ohms. At [illegible] kilocycles, no binder, [illegible] ohms, collodion, [illegible] ohms, commercial insulating varnish B, [illegible] ohms, commercial insulating varnish A, 101 ohms, shellac, 114 ohms, paraffin, [illegible] ohms. At [illegible] kilocycles, no binder 132 ohms, collodion 132 ohms, commercial insulating varnish B, [illegible] ohms, commercial insulating varnish A 147 ohms, shellac 157 ohms, paraffin, 107 ohms. At a radio-frequency of [illegible] kilocycles, no binder [illegible] ohms, collodion, 144 ohms, commercial insulating varnish B, 170 ohms, commercial insulating varnish A, 184 ohms, shellac, 172 ohms, paraffin, 187 ohms.

These results, as well as additional evidence, are responsible for the radio laboratory of the bureau of standards, in drawing up the following conclusion: "All the insulating materials which were used as binders caused very slight increases in the resistance of the coils. Collodion ranks best, and also has the inherent advantage of drying rapidly after application to the coil. This is of especial advantage in the construction of a bank-wound coil."

Test Tubes by Shifting to Different Sockets

Tubes are not uniform in their characteristics. After a tube or set of tubes has been used for several months, they will develop slight differences that will make some more suitable for radio-frequency, others for audio-frequency and still others for detector service. In order to tell which tube works best in a particular set [illegible], the operator should shift it from one socket to another, and note closely the effect will be observed.

The Best "Ground"

High resistance is introduced into the circuit by the heating system if a ground wire is connected to the radiator. This will have considerable effect on the receiving set. The cold water pipe is best for ground connections.

HOW TO KEEP WELL

DR. FREDERICK R. GREEN
Editor of "HEALTH"

(©, 1926, Western Newspaper Union.)

PERNICIOUS ANEMIA

WHEN I was a medical student, over thirty years ago, pernicious anemia was regarded as a rarity. Today it is so common that even the general public knows about it.

Everybody knows that ordinary anemia is a reduced condition of the blood or of the amount of iron in the blood, due either to loss of blood from hemorrhage or to lack of iron in the blood from insufficient food or improper food. But in the pernicious or dangerous form, there is not only a lack of iron in the blood but also a constant destruction of the blood cells going on, with a lemon-yellow skin, fever, disturbance of digestion and nervous symptoms that show serious interference with the nerves of the spinal cord. The public generally knows today that while life may be prolonged for years, there is as yet no known cure and that, sooner or later, the disease will overcome the body.

While the exact cause is not known, many facts have been demonstrated that help in the understanding of this mysterious disease and the care and treatment of its victims. In a recent issue of the Journal of the American Medical Association, Dr. Lewellys F. Barker of Johns Hopkins at Baltimore sums up what we know about this strange disease.

Pernicious anemia, he says, occurs in all countries with temperate climate, but is rare in the tropics. It is more common among men than women among Anglo-Saxons, but more common among women than men in Germany and Scandinavia. It is equally common among all classes, although it is generally considered more common among brain workers than among physical laborers. It is most common after forty, being rare among young people and never found in children. It appears to occur in families, sometimes in three or four successive generations.

Its characteristic condition is the destruction of the blood cells by the body itself, accompanied by degeneration of parts of the spinal cord. While improvement may take place for some time, months or years, the disease always terminates fatally.

But after all the principal public interest in any disease is treatment. What can be done for it? Not much, with our present limited knowledge. Present-day treatment cannot cure, but it can prolong life and make the victim more comfortable. Rest, administration of dilute hydrochloric acid and arsenic, blood transfusion, regulation of diet, frequent vacations for patients still able to keep up their work are all useful. Persons having family histories of the disease on both sides should not marry.

PREVENTING HEART DISEASE IN YOUNG

IN THE campaign now being carried on to prevent heart disease by controlling its causes, much attention is being given to the prevention of rheumatism, especially in children. It has long been known that rheumatic children developed valvular disease of the heart. The poisons in the blood which cause the inflammation of the joints also cause an irritation and inflammation of the lining membrane of the heart. In mild cases this disappears as the rheumatism grows better without causing any permanent injury to the heart. But in severe cases the irritation of the heart is severe enough to cause actual ulceration of the heart valves. These little ulcers as they heal produce scar tissue and the scars as they contract pull the valves out of shape, leaving the heart seriously and permanently disabled.

As the rheumatic poisoning is responsible for the heart disease the most effective way to prevent the child having a diseased heart is to guard it against rheumatism. This has become so important that the British Medical association has appointed a special committee on the subject which recently made a lengthy report.

The committee finds that children suffering from rheumatism need long and careful treatment if they are to recover fully from this disease. As this lengthy treatment is expensive and as rheumatism is especially prevalent among the poorer classes, the committee urges the need of special hospitals for rheumatic children like those now existing for crippled children. The cases are much alike. Rheumatic children are crippled; only in many cases the defect is not apparent. But crippled hearts need rest, care and treatment quite as much as do crippled legs.

Rheumatic children, says the committee, need rest, sunshine and fresh air for months.

In order to prevent the rheumatism, the committee urges greater care in the prevention of dampness in dwellings, the prevention of tonsillitis and, wherever necessary, the removal of the tonsils, as most cases of rheumatism start with an attack of tonsilitis.

Underfed children, damp living rooms, sore throats and infected tonsils produce rheumatism, rheumatism causes heart disease, to prevent which we must prevent its causes.

Too Much "Acid?"

Excess Uric Acid Gives Rise to Many Unpleasant Troubles.

AUTHORITIES agree that an excess of uric acid is primarily due to faulty kidney action. Retention of this toxic material often makes its presence felt by sore, painful joints, a tired, languid feeling and, sometimes, toxic backache and headache. That the kidneys are not functioning right is often shown by scanty or burning passage of secretions. Thousands assist their kidneys at such times by the use of *Doan's Pills*—a stimulant diuretic. *Doan's* are recommended by many local people. *Ask your neighbor!*

ALI-OIL for Rheumatism

Neuritis, Lumbago, relieving pain, etc. One of the Greatest Discoveries of the Age. An external remedy which reaches the blood and eliminates the cause. Clean, Pleasant, Effective. "I have tried All-Oil; it cured me when everything else failed." Mrs. [illegible] Young, [illegible] Howard Ave., Tampa, Fla. Guaranteed to give immediate relief. $1 Postpaid.
ALI-OIL SYNDICATE
30 Southern Building • Tampa, Florida

Plant Uses Much Water

The tremendous flow of water necessary in the operation of a large electric generating plant astonishes most people. The new Avon plant outside of Cleveland, Ohio, uses 420,000 gallons per minute mainly for the condensation of steam from the huge turbines that drive the generators. This means that the plant uses about as much water every half-hour as is consumed in a whole day by a city of 100,000 population.

Today's Big Offer to All Who Have Stomach Agony

Read About This Generous Money Back Guarantee

When you have any trouble with your stomach such as gas, heaviness and distention, why fool with things which at best can only give relief.

Why not get a medicine that will build up your upset, disordered stomach, and make it so strong and vigorous that it will do its work without any help.

Such a medicine is Dare's Mentha Pepsin, a delightful elixir that is sold by your local dealer and druggists everywhere with the distinct understanding that if it doesn't greatly help you your money will be gladly returned.

It has helped thousands—it will no doubt help you.

Seeing Herself

"Why do you go with Helen?"

"I use her as a foil."

"She says the same about you."

"She does? The deceitful thing!"—Boston Transcript.

HOW I IMPROVED MY HEALTH

Did It in Less Than One Month

As Mrs. Weaver herself says, "I was never very strong." This is a real statement describing her condition, for, according to her letters, she was subjected to no small amount of illness.

Fortunately, her sister was familiar with Lydia E. Pinkham's Vegetable Compound and begged Mrs. Weaver to try it. "After three or four weeks," writes Mrs. Weaver, "I felt a great difference in myself. I would go to bed and sleep sound, and although I could not do very much work, I seemed stronger. I kept on taking it and now I am well and strong, do my work and take care of three children. I never fail to tell my friends about your wonderful medicine, and I will answer any letters from women asking about the Vegetable Compound."—Mrs. Lawrence Weaver, East Smithfield St., Mt. Pleasant, Pa.

If you knew that thousands of women suffering from troubles similar to those you are enduring had improved their health by taking Lydia E. Pinkham's Vegetable Compound, wouldn't you think it was worth a trial?

In some families, the fourth generation is learning the merit of Lydia E. Pinkham's Vegetable Compound.

Girls

"Whatever made you accept the dentist?"

"Oh, I asked another dentist how much it would cost to fix my mouth."

Low-cost Transportation

Star Cars

IF you live in a part of the country where roads are rough, hills are steep, mud is plenty—or if there are long stretches of open roads where a sustained speed is necessary—you need a Star Car!

MORE POWER AND SUPERIOR QUALITY

WHAT THE PHOTOGRAPHS REVEALED

By MARGARET MIDDLETON

(©, by W. G. Chapman.)

"I WOULDN'T dream of accepting your half-price offer," said Mrs. Marvin, with all the liberal ingenuousness of a new and happy bride.

"I need work so sorely," explained Evelyn Boyd, "that I am willing to take anything I can get."

He was a gentleman, she saw that. His face showed cultured intelligence.

"You seem to be very anxious," she suggested, in a sympathetic, womanly way, and more than anxious was the reply.

"We are hard pressed, my sick wife and two little children. About all I know is photography. Until recently I had quite a lucrative position, photographing scenery for a railroad company. My work for them was completed some time ago and I have had to pick up what business I can in this way."

"Very well, you can take a photograph of the house—yes, and another of the garden and print up half a dozen of each."

Two days later, when Boyd delivered his order, he departed from his generous almoner well paid and with the promise of more work. Within the week Mrs. Marvin sent him to half a dozen wealthy friends. Then she called at the humble home of the photographer in her limousine, brought dainties for his invalid wife, provided for the children and scattered sunshine generally in the Boyd household.

Of course, Boyd was deeply grateful. Whenever he met Mrs. Marvin she had a pleasant, encouraging word for him. Her friends helped her to send word to Boyd. He found himself hopeful, prosperous, happy.

One morning as he chanced to pass the elegant home of the Marvins, he viewed a scent that at once troubled him. Mr. Marvin was just leaving the house. He came down the steps with an angry face, evidently greatly disturbed. He was a handsome man, but his features seemed to show traces of dissipation. Pretty Mrs. Marvin stood within the vestibule, one hand extended as if appealing to him to return. Then as her husband swung away she crouched back, covering her face with her hands as if in dire distress.

"Trouble! Oh, I hope not, though it seems so," reflected Boyd, sorely distracted on account of his good, kind friend. Then his thoughts were abruptly disturbed as a friendly hand touched his shoulder.

"Hello, Boyd, what you doing in this aristocratic quarter?" hailed his challenger, whom he recognized as an old-time friend.

"I am having a good deal of work in the neighborhood," explained Boyd. "Know the Marvins?"

"Oh, yes, Mrs. Marvin has taken a great interest in influencing commissions for me in her society circle."

"A sweet little lady, that," commented his friend. "Wasn't that her husband who just walked away? A fine fellow, but spoiled. Money, social standing, a charming wife, but he's on the downward path, I fear."

"I had not heard of that," murmured Boyd, very greatly troubled.

"She didn't know the worst and he don't realize it," went on the other. "So far his weakness is only getting in with a lively crowd of old college chums and dissipating. You can imagine what that will lead to in time. He comes home, say once a week, is brought in jolly but boisterous, in all savage and disgruntled the next morning. It's [illegible] that poor little woman's [illegible]."

All this was a revelation to loyal [illegible] Boyd and he was deeply [illegible]. Mrs. Marvin called him in a day or two later to see about enlarging some family pictures. He [illegible] he could trace a repressed [illegible] in her manner, the lines of [illegible] about her finely chiseled lips. [illegible], he dared not broach the [illegible] resting weightily on his mind, [illegible] proffer the earnest, helpful sympathy that stirred his honest soul.

"Poor woman!" If I could only aid her," was the constant burden of his thoughts. He saw the friend who had advised him of the situation and told him of his gratitude towards Mrs. Marvin, his anxiety to be of service to her.

"You can't break into a family row, you know," he was advised. "You'd get no thanks if you did. It's just [illegible] way. If Marvin could be made to [illegible] and see the ridiculous figure he makes. He would probably be shocked into behaving himself."

"I've got an idea!" mused Boyd [illegible] and hopefully, and he proceeded to carry it out. He was an expert photographer, as has been said. There came to him an inspiration to use his art to produce a salutary impression upon the reckless Marvin.

After that for nearly two weeks Marvin had a shadow without knowing it. Secretly but diligently Boyd followed him through two of his [illegible] "bouts with the boys." It was the morning after the last of these escapades that Boyd appeared at the private office.

"Mr. Marvin," he said, as they were alone, "I have called to show you some photographs."

Marvin had met him several times and was civil enough, but evidently [illegible]. The effects of his previous night's debauch had unnerved him. He was unhinged, probably ashamed, possibly repentent.

"The pictures comprise a series," went on Boyd. "They cover the doings of a man I deeply esteem, but who has fallen upon evil ways. I hope you will be patient while I exhibit them, and then tell you how and why they were taken."

Marvin regarded his visitor with slight suspicion. He gave a violent start and flushed deeply as he glanced at the first of the pictures Boyd handed him.

Then he forgot rancor and resentment at this overt invasion of his strictly personal affairs.

He was the center of all the photographs shown. In the first he was depicted with men, some of whom he would not even have recognized in his right senses.

The second showed him leaning from an automobile, a senselessly silly expression on his face, throwing coins to a hideous, jeering mob following the machine.

In a third he was being held up by two others while he made a speech to a grinning crowd at a street corner. Another showed him clinging to a lamp-post, helpless. So down the line, a truthful delineation of a tippler's progress.

"I suppose," he observed, looking up finally in a chagrined, shame-faced way, "that you wish to sell me these photographs to get them out of the way?" plainly intimating a suspicion of blackmail.

For reply Boyd seized the package, tore the cards to fragments and threw them into a waste basket.

"No, Mr. Marvin," he said, "I only wished to bring home to you what the dear, loyal wife who loves you so truly might feel, if she ever saw you as you have been. Oh! sir—"

"You need not go on!" cried Marvin poignantly, springing to his feet. He had seized the hand of his visitor fervently. His eyes were filled with tears.

"Never again!" he said. "First shame, remorse, then confession. I am going home to tell my wife that she need sit up no more fearing the unsteady step that has terrified her in the past. Heaven bless you for a true, honest friend!"

It was a happy-faced Mrs. Marvin who called at the Boyd home the next day, a hopeful-hearted, fervently grateful woman. Tearfully she told Mrs. Boyd of what her husband had done. Then, facing the noble, embarrassed fellow, she threw her arms around his neck and kissed him—as might a dear, dear sister.

Possible to Insure Almost Anything Now

Some motion-picture theaters are issuing cards to their patrons stating that they may "laugh their head off, for they are insured." The management has purchased a form of policy which reimburses it in case of medical attention for anyone suffering from hysteria as a result of laughing at the film.

This is only one of the many queer "risks" now covered by insurance. A father of twin daughters, fearing they might be kidnaped, obtained a burglary and theft policy on them which remained in effect several years and was canceled when the twins grew up. Insurance against the arrival of twins has been frequent to indemnify parents for any financial setback. A driver of [illegible] obtained a policy to protect him against claims that might be set up by persons bitten. Marine companies insure all sorts of articles. A jeweler insured his gold and diamond dental work against theft and theft and travelers obtained a policy on an [illegible] of the Holy city to reimburse them in case their valued possession was damaged by fire, shipping, or was stolen. A young woman journeying to this country from Europe to officiate as a judge at a conference of perfume manufacturers, had her nose insured against any accidental damage that might be suffered before the contest, impairing her efficiency.—Popular Mechanics Magazine.

Spices Not Harmful

Few items are more essential than spices to the well being and comfort of our people. Many things would not be used as food if they were not made palatable by the use of spices and flavoring extracts. While perfectly good and wholesome themselves some foods are not appetizing and would not be relished unless flavored.

The idea that spices are unhealthy or cause certain troubles has been proved to be unfounded. On the contrary, spices are largely instrumental in increasing appetite and aiding digestion, and are known to be very wholesome and necessary with our daily food. In Mexico and other spice producing countries, where the natives use large quantities of spices in nearly all their foods, people live as long as Americans, if not longer.—Tea and Coffee Trade Journal.

Mighty City of London

Residents of London, as well as visitors, are quite unequal to visualizing that 8,000,000 persons dwell in Greater London. This is 2,000,000 more than the vast continent of Australia and only 1,500,000 fewer than the population of Canada. There are 11,000 persons to the square mile in London, compared with less than two in Australia, says the Vancouver Province. Based upon their taxable value, the buildings of London are worth $300,000,000 and it would require the whole lifetime of several persons merely to look at them. Greater London has 2,500 miles of streets and their upkeep costs $15,000,000 a year.

Not as Yet

This week's medal for optimism goes to the tiny black boy who, selling figs on the uptown section and told that the broiling sun would spoil his stock before he had sold it all, replied: "No, suhsir, I ain't never had a fig spil' yet. I eats 'em befo' they spil'."—New Orleans Times-Picayune.

Betty's Comment Also Straight From Heart

Little Betty, age two, was just beginning to talk more or less fluently and had acquired the habit of picking up expressions from other members of the family and using them, though she had no idea of their meaning. She had somewhere learned the exclamation, "For heaven's sake," and though her elders tried to prevent her she persisted in its use.

One evening she accompanied the hired men to milk and was much interested, drawing very near the cow and asking questions. Suddenly Bossy, sleepily chewing her cud and apparently without malice aforethought, gave a vicious swish of her tail, narrowly missing Betty and hitting the hired men full in the face. He was irritated, to say the least, and what he said to the cow came straight from the heart. It may have shocked the cow, but Betty looked on with the greatest composure till he ended, then she spoke.

"Well, for heaven's sake," she said.—Indianapolis News.

Shade Trees Bear Nuts

Col. Charles Goodnight of Amarillo, Texas, has completed experiments for growing nuts on trees that are well suited for shade. In this way he made trees productive as well as suitable for shade, so much needed in that section. Colonel Goodnight is ninety years old and his task has been a laborious and long one.

Keefe Gives Advice on Health

Quick Recovery From Severe Stomach Troubles, Nervousness and Run-down Condition Proves Value of Tanlac.

Patrick Keefe, well-known citizen living at 21 Court Street, New Haven, Conn., suffered from many serious ailments for several years before he found relief. He says: "My stomach gave me so much trouble I became weak and run-down. Everything I ate caused continual belching and gas that bloated my stomach.

"The poisons of constipation swept through my system ravaging my liver and kidneys. Whenever I moved pains shot across the small of my back. And my nerves became affected. Instead of sleeping at night I would toss and turn. For two years I suffered intensely. Then Tanlac came to the rescue.

"This wonderful tonic cleaned out my system, toned up my organs, relieved stomach trouble and nervousness. It gave me new strength and health. I recommend Tanlac to everyone."

Give Tanlac an opportunity to relieve your suffering, to give you health. The first bottle brings amazing results. At your druggist's.

Hospital Color Scheme

An ideal color scheme has been worked out for the different rooms at the new medical school and hospital at the University of Denver.

The X-ray room has walls of a violet red, which has great light absorption power, yet exerts a quieting influence on the patient, and is slightly stimulating to the operator.

In the operating room a soft gray is used. The wards for disturbed patients have yellowish green walls, because this color has been found to have a tranquillizing and cheerful influence.

Rooms with a northern exposure have yellow walls, and those with a southern outlook have sunshine gray walls and furnishings.

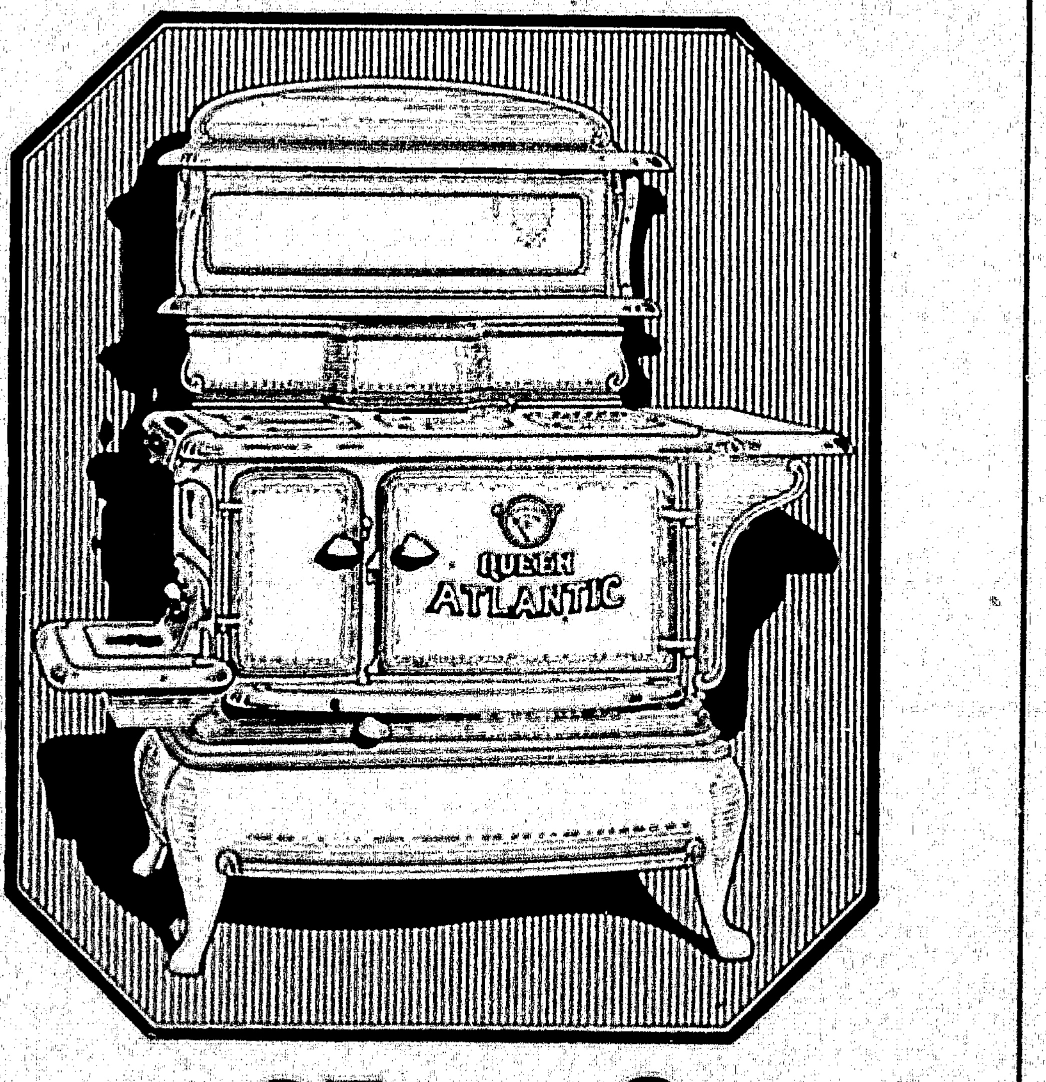
Church School Convention
RUMFORD
[Rev. D. B. Holt's Church]
SEPTEMBER 29 (10 A. M. TO 10 P. M.)
Dinner and Supper provided by entertaining church
Two Trained State Leaders

The program is different. Each church asked to appoint two (2) delegates. One to be instructed to tell about the most worth while feature of his or her school during the year.

Look for programs on your church bulletin Sunday.

THE BETHEL METHODIST CHURCH
Chester B. Oliver, Minister

Atlantic RANGE Week



Sept. 27 to Oct. 2

YOUR OPPORTUNITY to secure one of the famous Maine Made Atlantic Ranges on specially advantageous terms. These ranges have been standard in New England for 50 years. Wonderful for baking and general cooking, quick response and ease of draft control — economical to buy and to operate. Abundance of hot water at no extra cost. Hundreds of styles, beautifully finished in satin black or in the popular grey porcelain enamel, cleaned with a damp cloth — no blacking. Combinations for coal, wood and gas. Compare the Atlantics with any other for complete and long-lived satisfaction. All Atlantic products carry a double guarantee of manufacturer and dealer.
